

## Description

---

These Labor cobalt HSS metal drill bits from Forgefix are manufactured from alloyed high speed steel with 5 percent cobalt, which gives the drills an extreme hardness factor. Due to full grinding during production these drills are high precision and an accurate split point ensures stable drilling. They are right hand, have a cylindrical shank and are suitable for drilling stainless steel, cast iron, steel and pipe.

## Features

---

- Fully ground
- Type N
- M35 steel
- 5% cobalt alloy
- 135° cutting edge
- Right hand
- DIN338
- Suitable for drilling stainless steel, cast iron, steel and pipe
