

Description

This ISO proximity card licence allows the activation of HID proximity 125kHz functionality on compatible Paxton readers. It is available to activate a single reader or ten readers, which will retain the capability to read Hitag2 (Paxton) and EM tokens after activation.

Features

- For Wiegand output you will also need a Wiegand activation card
- Please note : Not all Paxton readers can be activated for HID
- Available as single or 10 activations
- Readers activated will retain the capability to read Hitag2 (Paxton) and EM tokens
- Allows activation of HID proximity 125kHz functionality on compatible readers
