PAXTON Licence Activation Card 125kHz ISO With Genuine HID Technology

Description

This ISO proximity card licence allows the activation of HID proximity 125kHz functionality on compatible Paxton readers. It is available to activate a single reader or ten readers, which will retain the capability to read Hitag2 (Paxton) and EM tokens after activation.

Features

- For Wiegand output you will also need a Wiegand activation card
- Please note : Not all Paxton readers can be activated for HID
- Available as single or 10 activations
- Readers activated will retain the capability to read Hitag2 (Paxton) and EM tokens
- Allows activation of HID proximity 125kHz functionality on compatible readers
