

Description

This Wiegand activation card with genuine HID technology is for use with HID enabled Paxton readers and allows the user to toggle the Wiegand functionality on or off. Having HID Wiegand enabled will mean that Hitag2 (Paxton) and EM tokens will no longer be read by the reader; however, toggling HID Wiegand off again will allow them to be read again.

Features

- To activate a Wiegand Card an HID licence must first be activated
- Please note Wiegand output not supported on Desktop readers, Paxlock or Entry ranges
- Toggling HID Wiegand off will allow Paxton and EM tokens to be read again
- With HID Wiegand enabled , Hitag2 (Paxton) and EM tokens will no longer be read
- Allows the user to toggle Wiegand functionality on or off
- For use with HID enabled Paxton readers
