

MASTER LOCK Electronic Combination Safe Fire & Water Resistant

Description

The Master Lock FPW082FTCML is a fire and water resistant security combination safe. The body is constructed from steel with impact resistant polymer and there are three 2.5cm diameter steel bolts which lock automatically when the door is shut. There is an electronic backlit keypad, interior lighting and key hooks on the inside of the door.

This safe is £1000 cash rated and offers protection of contents such as documents and other valuables against the risk of flooding (ETL approved for immersion in 12cm of water for 24 hours). It is supplied with a shelf, two CR123 lithium batteries and a waterproof anchoring kit.
