

# GJ LOCKS Union, Chubb & Yale Mortice Decoding System

## Description

---

This decoder system by GJ Locks is one of the simplest and straight forward mortice lock decoder sets available on the market today, covering a range of the most popular locks of Union, Chubb & Yale in the UK today. No measuring or guesswork is required when following the standard procedure which uses plastercine impressing, milled impression keys and an innovative jig to very quickly provide the code for the lock. A revolutionary key bit system is then used to build the key. The method of entry used is non-destructive and allows the lock to be easily re-locked after picking.

UK Manufactured
