

GJ LOCKS Pick To Suit Brisant Ultion, WXM And D Section

Description

This GJ Lock pick is used to open all of the Brisant dimple cylinders including Ultion, WXM and D sections. It features a unique removable clicker that allows users to quickly locate the pick above each pin. If desired, the tool can be withdrawn at any time to enable a plug spinner to be used. Supplied in a sturdy protective case, this pick includes one blade and a tool kit to allow for user adjustments to be made. It now comes with new U12 blade to overcome the newer profile locks with added anti pick pin.

Dimple Key
