

ADVANCED DIAGNOSTICS MVP Pro Electronic Tokens

Description

Adding tokens to your MVP PRO tester will enable you to program additional vehicles, the more tokens you order the lower the unit cost goes. Please advise your MVP PRO Serial Number when ordering tokens. If you have forgotten to reload your tester with tokens and have an emergency job to do, the tester will allow you to go into minus tokens to get the job done. Please note however, as emergency tokens are double the cost, each minus token on your tester will take 2 new tokens from your next new quantity reloaded.

Call To Order Product
