

Description

Designed to suit all Hooply personnel door ranges, the 918902 Handle Set acts as a stylish upgrade to standard handles, as well as having improved security due to their stainless steel construction. These lever handles feature a return-to-door handle style, making them ergonomically friendly and suitable for DDA applications. Additionally they feature an oval shaped security cover to conceal the cylinder. Please note that, although this appears to be an oval shape, this unit is to be used with a euro profile cylinder.

68mm Centres

Operated By Euro Cylinder

Features

- With cylinder cover
- RTD style lever pair
- Handed product
- Designed for use with a euro cylinder (cylinders sold separately)
