

Description

This Hooply ST32# Panic/Escape Lock Case is designed to be a new, improved, higher security sashlock. It replaces the standard 3 centre shoot bolts with 1 rectangular hardened steel shootbolt - a more robust and attack resistant style. It may also be used as a panic escape sashlock as the internal handle overrides the locking mechanism in the event of an emergency, without requiring keys.

68mm Centres

Operated By Euro Cylinder

Features

- Uses an improved solid hardened steel rectangular shoot bolt
- Handed product
- Designed for use with a euro cylinder (cylinders sold separately)
