

HPC CGIT-10 Clean Grip Impressioning Tool

Description

HPC's CGIT Clean Grip Impressioning Tool holds onto the center of the inserted key blank and not by the face. This eliminates the possibility of scratching the key blank, whilst providing a firm hold. The CGIT has a unique locking mechanism with a retaining pin that ensures a tight grip in the key blank. Thanks to its cushioned handle, the tool is comfortable and easy to hold. The CGIT-10 tool will hold a variety of key blanks and has been designed to be simple, quick, and dependable.

Features

- The blank is gripped by the centreline so there are no marks or scratches on the face, which saves using another key blank
- The cushioned handle makes the CGIT comfortable and easy to hold
- The unique design provides a firm grip on a wide variety of key blanks, without marking the face of the key
