

HPC CO75 Horizontal Clutch Car Opener

Description

The HPC patented CO75 Horizontal Clutch™ Car Opener is unlike any other on the market. When the handles of this tool are separated, the hook at the end of the tool is pulled inward causing the tool to grip or bind the horizontal linkage rod.

Features

- For horizontal linkages
- Clutch tools are patented in the USA
- These tools are also very effective on shielded linkages (CO-75)
- The clutch tools are true innovations in car opening Separate the handles to pull the hook in and firmly grip the linkage
