

HPC FAL-15X Flex-A-Light

Description

The HPC FAL-15X Flex-A-Light™ is more flexible than other bending lights, yet rigid enough to keep straight. The FAL-15X does not use a switch and the lights turn on the moment the light extension is plugged in. The Flex-A-Light™ is equipped with an extremely durable cool-touch LED to stand up to heavy use, giving it a life expectancy of about 100 times that of an incandescent bulb. The cool-touch aspect of the LED furthermore, makes worrying about a hot bulb breaking a cold window a thing of the past. This set includes a suction cup to conveniently secure the light to the window and can be extended to 36` (91mm). The FAL-15X can be carried around in your pocket and runs on 3 AA batteries.

Features

- Requires 3AA batteries
- Suction Cup
- 36 inch (91cm) Extension
- 15 inch (38cm) Light Power Handle
- Cool-touch LED
- Equipped with a durable, long lasting LED
