

## HPC LW100 Lever Wedge

### Description

---

The HPC LW100 Lever Wedge introduces an easy way to wedge open vehicle doors. The Lever Wedge is designed with two pivot points which allow you to spread a door from its frame and then, with a simple push, wedge it open. Once in place the door can be separated farther with the HPC Lever Wedge's secondary lever operation. With this tool no other wedge is needed to hold the door in place after prying it open.

### Features

---

- No need for a separate wedge
- 2 pivot points
