

INTERFLON Eco Degreaser

Description

This industrial strength Eco Degreaser from Interflon utilises F-Active technology to degrade organic matter making it a highly effective surface cleaner and degreaser. Both Halal and European Eco-label certified, this cleaner is suitable for use in the food industry.

Another application for this industrial strength Eco Degreaser is that it can be used on dirty or worn key blanks to enhance the electrical contact between the tracer and the key blank, it makes the reading of the keys easier and more accurate; especially on older keys.

Features

- Does not attack paint
- Environmentally sustainable product (European Eco-label)
- Designed to clean and degrease a wide range of surfaces, machine parts and utensils
- Non-flammable
- Ideal for use when key cutting to enhance the electrical contact between the tracer and the key blank
- Suitable for use in the food industry (NSF approved)
