

Description

The PROXIMITY architectural reader has been designed to fit discreetly and stylishly into installations where aesthetics are paramount. The reader is manufactured using high quality materials and has 3 high intensity LED's. The reader consists of two main parts, the reader and the insert. 3 standard types of insert are available; wood, glass and stone. We can supply the dimensions of the insert to allow the use of other non-metal materials (see the insert drawing in the web links box on this page). This gives limitless possibilities of installing a reader that is truly sympathetic with its environment.

Features

- 2 bezel styles available
- 3 standard inserts available
- Designer reader to match interior of buildings
