

Description

The PROXIMITY metal reader is for use with Switch2 and Net2 systems. It is contained in a cast metal housing which results in a smart, rugged reader. As the reader is already housed in metal, its operation is affected less by fitting within close proximity to other metal objects. This makes it suitable for installation onto metal door frames, car park reader posts etc.

IP 67 Rated

Weather Resistant

Features

- Supplied with security screws and key
- Metal construction
- Suitable for external use
- Designed for mounting on metal
- For use with Switch2 & Net2 systems
