

## PAXTON Switch2 / Net2 Metal Proximity Reader

### Description

---

The PROXIMITY metal reader is for use with Switch2 and Net2 systems. It is contained in a cast metal housing which results in a smart, rugged reader. As the reader is already housed in metal, its operation is affected less by fitting within close proximity to other metal objects. This makes it suitable for installation onto metal door frames, car park reader posts etc.

IP 67 Rated

Weather Resistant
