

PAXTON 568-855 Switch2 / Net2 Vandal Resistant Proximity Reader

Description

The vandal proof reader is for use with Switch2 and Net2 systems. The barrel-like construction of the reader means that it can be buried in a wall. This means that it is ideal for use in vandal prone areas where malicious damage could be a problem. A black cap is supplied with the reader. The end cap is used as a marker, so users know where to present their tokens. Replacement covers are available to Paxton registered installers free of charge.

IP 67 Rated

Features

- Vandal resistant
- Fully concealed 'bullet type' reader
- Different colour covers available
