

Description

The term 'Hands free access control' means the token that identifies a user is read from within a pocket or handbag. No hands required. This is useful for gates and barriers, loading doors and where disabled or elderly people require access. The hands free keyfobs, in conjunction with hands free interface, achieve this using the unique wireless technology.

Features

- Batteries last an average of 5 years
- Compatible with most Paxton Access readers equipped with a hands free interface (477-422)
- Active tokens with replaceable batteries
- From 05m to 6m read range dependant on the reader used
