

Description

Easyprox nano is an all-in-one battery powered lock reader and access control unit that is ideal for internal doors. Easyprox nano is designed for use with the Net2Air USB bridge or the Net2Air Ethernet bridge to give the advantages of a networked access control system. Networked access control provides event reporting and flexibility over users' access rights. Installing the system is easy because it is not wired into a mains power source.

Easyprox nano connects to the administration PC using Paxton Access' proprietary and secure wireless technology.

Easyprox nano is perfect for internal doors where wiring would prove difficult.

Easyprox nano should be used with Net2 software.

Features

- Low battery warning
- Spare battery packs available
- Anti-shim plunger to prevent forced entry
- Amazingly easy to install
- No wiring - Wireless communication with the PC
- Wireless, battery powered access control
