

Description

A range of 12V dc power supplies for use with Paxton Access systems. All are designed to connect to a standard UK mains supply via a switched fused spur connection. When installed with the appropriate battery (not included), the power supply will continue to provide 12V dc for an extended period in the event of a power failure. The exact duration of the backup period will be dependent on the power consumption of the access control system and the capacity of the battery.

Features

- 2A boxed backup power supplies
- Backup batteries
- Different enclosure options
