

Paxton PAXTON Compact Plastic Proximity Reader

Description

PROXIMITY compact is a single door access control system. All of the electronics are within the housing of the reader. Compact systems can be installed to many doors over a site, all using the same cards. The P series readers are supplied with a black fascia that can be fitted in the final stages of installation. Replacement fascias are available to Paxton Access registered installers free of charge.

IP 67 Rated

Weather Resistant
