PAXTON 337-837 Net2 Entry Panel

Description

Net2 Entry is a door entry system that works standalone or alongside Paxton's Net2 access control, combining door entry with key features of Net2.

Net2 Entry comes in a discreet design that is suitable for a range of environments. The Net2 Entry panel has an attractive brushed steel effect for a smart appearance and durability. The panel can be mounted onto a metal surface if required.

Features

- IP55 rating for use in all weather conditions
- Infrared camera for low-light use
- Robust external panel comes with a keypad and RFID reader
- Units auto detect on setup for straightforward installation
