

## PAXTON Net2 Plus Control Unit With 2A Power Supply

### Description

---

Net2 is a networked access control system. A networked system gives the advantages of central control, event reporting and flexible control over users' access. Each control unit is part of a network but can run independently making its own decisions and remembering events. This controller is supplied in a box complete with a 2 amp power supply.

### Features

---

- Plug into a TCP/IP network using a standard RJ45 plug
- Single door networkable access control unit
- Net2 plus can replace a TCP/IP converter
- Net2 plus can also connect using RS485
- Diagnostic LED's
- Net2 plus, Net2 classic and Net2 nano control units can be mixed on a site
