

SAFEWARE 8 Lever Operated Latch & Hookbolt Twin Spindle - 2 Hook 2 Bolt

Description

The Safeware 8 is a lever operated multipoint lock system with a 35mm backset, 92/62 centres, a 16mm wide faceplate, 2 hooks and 2 bolts. It can be operated by lifting the lever to engage the locking mechanisms and turning the cylinder fully, thus locking the unit. One full turn of the key followed by a downward push of the lever will unlock the system when locked. This lock features a euro profile lock case, twin spindle and reversible handing for extra convenience.
