

ADVANCED DIAGNOSTICS ADC219 VAG Instrument Reset Cable

Description

The ADC219 VAG cable connects between the AD pro tester and the vehicle's OBD port and is specifically used when the vehicle key is lost for various VAG group vehicles, please see Info Quest for full list of models supported.

Please note that you require ADS230 software (VAG Instrument Reset) to use with the ADC219 cable, that the transponder type used will depend on the brand and the geographic region of where you are working and also that precode data may be unique to each vehicle chassis.
