

SILCA AntiGrip Graphite Lubricant

Description

This graphite powder lubricant from Silca is ideal for use in locks which cannot be used with wet lubricant. It helps to ensure the internal mechanism of cylinders, such as lock pins and springs, continue working smoothly. It is grease-free, odourless and weather resistant, doubling as antifreeze as it cannot be frozen in cold weather which makes it ideal for car locks, external padlocks and more.

Features

- Built in applicator
- Doubles as antifreeze
- Natural graphite powder
- Dry lubricant for locks and other mechanisms
- Ideal for use in cylinders
