SILCA D731433ZB Tex Code Advanced To Suit RW2

Description

The Silca Tex-Code Advanced is a module which expands the capabilities of the RW2 to clone fixed code and Texas Instrument (TI) ecnrypted code transponder keys directly at the counter. This system will eliminate the need for two (original) master keys required for `on-board` programming.

Features

- Easy set up with step-by-step software guidance
- Clone keys without the need for two master (original) keys
- Capable of cloning TI encrypted and fixed code transponders
- Expansion module
- Suits the RW2 machine
- Genuine Silca product
