

ALPRO DB38 12V/24V DC Monitored Solenoid Bolt SS

Description

The Alpro DB38 electric deadlocking bolt incorporates the latest design innovations to be applied to the manufacture of a transverse action deadlocking solenoid bolt. This electric deadlocking bolt offers the highest level of security, quality electronic ingenuity as the DB25 but with increased strength primarily achieved by utilising a larger diameter bolt pin, the DB38 is the preferred option when high physical strength is needed.

Features

- Bolt throw 14mm
- Holding force 2000kg - automatic deadlocking
- 14.2mm diameter bolt pin
- 5 year guarantee

Product Table

 A photograph of a metal L-shaped bracket. The vertical part is 38mm wide and has a hole near the top. The horizontal part is 38mm long and has a hole near the end. The bracket is made of a light-colored metal, possibly aluminum or stainless steel.	<p>L18091</p> <p>F/U 38mm - Key</p>
