

Description

The Magna Latch range is ideal for use on gates around homes, gardens and swimming pools (when installed according to local regulations). Using the same high strength magnets as the rest of the MagnaLatch range, the Lockable Side-Pull MagnaLatch is constructed from durable engineering polymers and stainless steel components, and is designed to last a lifetime. It allows for vertical and horizontal adjustment of up to 10mm, which makes installation easier and allows for post-installation fine-tuning of latch alignment. The latch is magnetically triggered but is also key lockable for added convenience, and comes supplied complete with two keys and all fixings.

Supplied With 2 Keys

Weather Resistant

Features

- Easy to install
- Magnetically triggered
- Will adapt to glass pool gates
- Key lockable
- Rust proof
- Ideal for square posted gates
