

Description

Designed and manufactured in the UK, this 600 door closer series from Arrow represents the ultimate in fire door safety and ease of access. The 600 series can be configured as either hold open or free swing access and will automatically close upon detection of a fire (if correctly connected to the building's fire detection system).

Featuring both adjustable latching action and closing speed, this unit is well suited for use in hospitals, schools, theatres and residential homes where the occupants may benefit from a slower closing speed. CE marked and Certifire approved, this door closer has been fire tested to BS EN 1634 (part 1) for timber doors up to 120 minutes.
