

SILCA Transponder Chip T80

Description

This Silca Texas T80 transponder chip will clone transponders for Toyota models worldwide which use the 80-bit 'G-type' Chip; the carbon wedge design fits all Silca & Genuine Transponder Keys & Remotes.

It can also be used in conjunction with the Silca TRP setting & an RW4 plus or Fastcopy plus to generate transponders for popular 80-Bit Toyota, Ford, Subaru, Kia and Hyundai models, which are then ready for programming with Advanced Diagnostics devices.

Please see Useful Downloads for full Vehicle Application list.

Contains A Transponder Chip
