

Description

This Skanex 52mm diameter double cylinder ring set is supplied with both an internal and external escutcheon and is to suit Scandinavian cylinders. It is of solid Stainless Steel construction and is supplied complete with secure bolt through fixings that you can cut down on site to suit your application. It has 2 partial wings on the internal escutcheon to provide an attractive finish by covering up the bolt through fixings on the internal Scandinavian cylinder and is available in two depths (11mm & 13mm) to make it suitable for differing thicknesses of door and lengths of cylinder.
