

SQUIRE SS EM Stronghold Open Shackle Padlock Body Only

Description

The Squire SS Stronghold SS50EM and SS65EM Steel Euro Profile Open Shackle Padlock are tested to the highest CEN grades and designed for use in maximum risk situations and in harsh environments. These padlocks, with a solid hardened steel body and hardened boron alloy steel shackled offer the very best in security.

The Euro profile 'E' versions of Stronghold padlocks are purpose designed for easy and secure fitment of an SC65 padlock insert or a modified 71mm double Euro profile cylinder with no need to drill the cylinder. The benefits of the incorporation of a cylinder mean that this padlock is ideal to integrate into a masterkey system or that the locking mechanism can be changed cost-effectively without the need to replace the whole padlock.

10 Year Guarantee

Operated By Euro Cylinder

Weather Resistant
