

THOMAS GLOVER 32951 Redlam Mk2 Break Glass Bolt

Description

Designed for interconnecting emergency exit doors. Operates on one side of the door by breaking the Ceramtube™ and on the other side of the door by pushing the knob.

Manufactured from cast aluminium, Redlam panic bolts are the economical solution to the problem of providing reliable security for internal emergency exits.

Features

- Supplied complete with hammer and chain
- Designed for interconnecting emergency exit doors
- Designed to produce no sharp edges when smashed
- Operates on one side of the door by breaking the Ceramtube™ and on the other side of the door by pushing the knob
- Manufactured from cast iron aluminium
- Breaking the Ceramtube™ results in the bolt sliding back automatically and unlocking the door.
