

VIDEX 316 (72J) Balanced Video 4 Way Splitter

Description

The Videx 316 (72J) is a 4 way non coaxial (balanced video) video splitter for all non coaxial video systems. There are four outputs to videophones plus an input and a loop through to the next video splitter. The 316 (72J) includes terminating resistors and has an input voltage of 20Vdc.

Features

- 75 Ohm between both balanced outputs and 0V
- End of line termination required
- 110mm x 70mm x 30mm
- 20Vdc input voltage
- 4 balanced video outputs
