

## WINKHAUS BlueMatic Motor Unit To Suit AV2, AV3 & AV4

### Description

---

This blueMatic motor unit from Winkhaus is an optional add on which upgrades the AV2, AV3 or AV4 Autolock to have the capability of becoming an electronic access controlled locking system. The lock is designed to accept a "screw on" 12v electronic motor which can then be controlled by means of industry standard access control systems. When activated the two solid high tensile steel hooks and central latch are withdrawn. The extreme versatility of the blueMatic electronic locking system is achieved through its easy integration with all access control systems which subsequently leads to its suitability for many different applications.

## Features

---

- Easy to install
- Retro fits to Winkhaus AV2, AV3 or AV4 multipoint locks
- Can be linked to an intercom system, remote control, etc
- Can be used on UPVC, wooden, aluminium or composite doors
