

WINKHAUS AV2 EntryGuard Lever Operated Latch & Deadbolt 20mm Radius - 2 Hook

Description

This Entryguard AV2 multipoint lock has a 20mm wide radius faceplate and incorporates 2 hooks. The lock has the optional capability of becoming an electronic access controlled locking system and is designed to accept a "screw on" 12v electronic motor which can then be controlled by means of industry standard multi option access control systems. When activated, the two solid high tensile steel hooks and central latch are withdrawn thus forming the blueMatic AV2-E. The extreme versatility of the blueMatic AV2-E Electronic Locking system is achieved through its easy integration with all access control systems which subsequently leads to its suitability for many different applications.
