

WINKHAUS blueMatic AV2-B Electric Multipoint Lock - 2 Hooks

Description

The Winkhaus blueMatic AV2-B is a keyless, remote operated door locking system which locks via an automatic slam lock feature, ensuring the door locks upon closure. The unit requires 2 x AA batteries, giving it a battery life of 2 - 3 years, and will take a double or half euro cylinder, although a cylinder is not required to lock or unlock the door (cylinders and batteries sold separately). This is such a convenient locking solution as it eliminates the need for keys, increasing efficiency and peace of mind regarding locking times. The lock supports up to 10 remote control fobs per door, each with 18.4 billion rolling code combinations.
