

ASEC Junction Box Combi 308/5 IP66/67 32AMP

Description

The 308/5 Junction Box from Asec is made from thermoplastic polypropylene with a spacious bellied cover and comes supplied with all required fixings including a mounting clip for snap-on fixing. It is to be used for electrical installations and is ideal for use with the Lyntek range of lighting. For added convenience, cable glands can be mounted directly to the integrated thread without requiring the use of locknuts. The device is rated IP66 with membrane or membrane screws and IP67 with cable glands; this weather and UV resistance makes them well suited to external installations.

5 Pin Mechanism

IP66 Ingress
Protection Rating

IP 67 Rated

Weather Resistant
