

YALE DOORMASTER PAS3621:2011 Replacement Lock

Description

The Yale Doormaster™ PAS3621 multi-point lock is a maximum security British Kitemark approved replacement lock for any lock with top and bottom hooks or bolts, a 35mm or 45mm backset and a 16mm or 20mm faceplate. PAS3621 locks should be used in conjunction with a TS007 3 star cylinder and handle solution to achieve the maximum level of security.

Special features such as rounded edges and fixing tabs ensure replacement installation is safe, simple and secure. In addition to this the lock is supplied complete with 3 keeps and the flexible `crop & mate` design enables professionals to simply cut the lock to length and position gearboxes to match locks being replaced.

Features

- Recommended in NHBC and RISC Authority guidelines
- 3 x maximum security anti-separation and hardened anti-drill hooks
- Non-handed easily reversible latch
- Yale Keyfree compatible
- 10 year guarantee

- 16mm or 20mm faceplates
