YALE Conexis L1 British Standard Smart Door Lock - No Module

Description

The innovative and easy to install TS621:2018 Kitemarked Yale Conexis L1 Smart Door Lock can be managed entirely from your smartphone via the Yale App. It is suitable for use with the majority of multipoint locks in the market and compatible with the Yale Smart Home system (Yale module available to special order) including existing Yale alarms and CCTV systems and gives users the flexibility to choose from four different keyless entry methods (app, key card, key tag or phone tag).

Some home insurance companies insist on Kitemark approved locks as a requirement to give cover, while others may offer a discount for the increased security. The Conexis is now the first ever Smart door lock in the world to become Kitemark accreditted, the standard has been designed to provide homeowners with the peace of mind that they can enjoy the convenience and lifestyle benefits of a smart lock, without having to compromise on the security of their home.

To achieve the new standard, the Conexis® L1 underwent rigorous testing including quality, durability and physical attack testing. These tests include the PAS24:2016 attack testing and the TS007 3-star cylinder attack test. It also underwent electronic manipulation and assessments designed to test the electronic security of the lock to ensure it is secure against advanced hacking methods. For added safety, British Standard smart locks also require a mechanical release on the inside of the door, that doesn't require electronics, to ensure an easy escape in the event of a fire.

The unique Twist & Go feature allows users to quickly open the lock by simply turning their smartphone 90 degrees. The comprehensive App can be used to create & share access codes as well as monitor who has used the lock.

The secure push & turn thumbturn is engineered to give additional convenience and security to your door and, additionally, a 9V battery connection port can be used to power the Smart door lock in the event of flat batteries. This product also features a built in anti-tamper alarm, a 2 year guarantee, and connects to leading smart home systems when the appropriate module is fitted.

2 Year Guarantee	Works With An App	Kitemarked Product	Weather Resistant
